

IMS CarePortal™

*Improve Your Communications and Provide Patients
with the Convenience of Online Services*

Your PRACTICE can:

- » Reduce incoming phone calls and redundant paperwork
- » Streamline the check-in process
- » Manage appointment requests/changes online

With the CarePortal, patients can communicate with your office and complete many routine tasks online at any time. They can input most of the information they traditionally provide during check-in in the comfort of their home or office in advance. Patients appreciate the convenience of being able to shave a few minutes off their wait time, and this can have a positive impact on overall patient satisfaction.

Your PATIENTS can:

- » Request and view appointments online
- » Complete practice registration online
- » Fill out a symptom assessment
- » Complete custom health forms
- » Request prescription renewals easily
- » View their health history and research items such as medications
- » Receive lab result interpretations
- » Access clinical information 24/7
- » Pay their bills online

Discover the newest version of the IMS CarePortal™ from Meditab Software and experience enhanced simple navigation, a more streamlined look and more tools to benefit your practice. Tightly integrated with the IMS EHR and Practice Management system, the CarePortal allows patients to access and update their secure Electronic Health Record (EHR) data from anywhere they have internet access. The CarePortal gives your patients 24/7, anytime, anywhere access to Appointment Requests, Prescription Information / Refill Requests, Secure Messaging Tools, Online Bill Pay, Educational Information, Lab Results, and much more. This saves your staff time and improves overall communication with your patients while helping you meet Stage 2 Meaningful Use requirements.

INCREASE STAFF EFFICIENCY AND EMPOWER PATIENTS

The convenience and accessibility of the IMS CarePortal are major benefits to you and your patients. In traditional offices, the staff can spend a tremendous amount of time answering patients' telephone calls regarding appointments, medical record requests, prescription refills and more. While building and maintaining relationships with patients is very important, many types of communication can be automated without compromising customer service or quality of care.

RECEIVE INSTANT UPDATES AND ACCURATE INFORMATION

It's imperative that healthcare professionals have access to real-time updates to medical records. The CarePortal helps ensure that patients' records contain the most up-to-date demographic information, insurance, histories, medications, allergies and more.

Another benefit of the CarePortal is that providers can create customized disease and health management plans and disease-specific health reminders based on their patients' individual needs. For patients with chronic conditions such as diabetes or heart disease, the goal is to improve quality of care and have a positive impact on clinical outcomes. The CarePortal can help you do that.

In traditional offices, making the slightest change to a patient record creates a long trail of paperwork. For example, updating insurance information requires pulling the chart, photocopying the card and completing new paperwork. With the CarePortal, all this is done quickly and easily online. Because patients change insurance often, this is a huge time-saver for your practice.

Benefits of IMS CarePortal

- » Give your patients access to the online tools they want
- » Receive 24/7 access to clinical information anytime, anywhere
- » Save staff time and increase efficiency
- » Reduce incoming phone calls and redundant paperwork
- » Allow patients to complete forms online
- » Decrease office wait times
- » Communicate better
- » Demonstrate that your practice is using the latest technology

The screenshot displays the IMS Care Portal website. At the top is a navigation menu with links: Home, About Us, Our Staff, Services, Appointment, Resources, Locations, Contact Us, and Help. The main content area is divided into several sections:

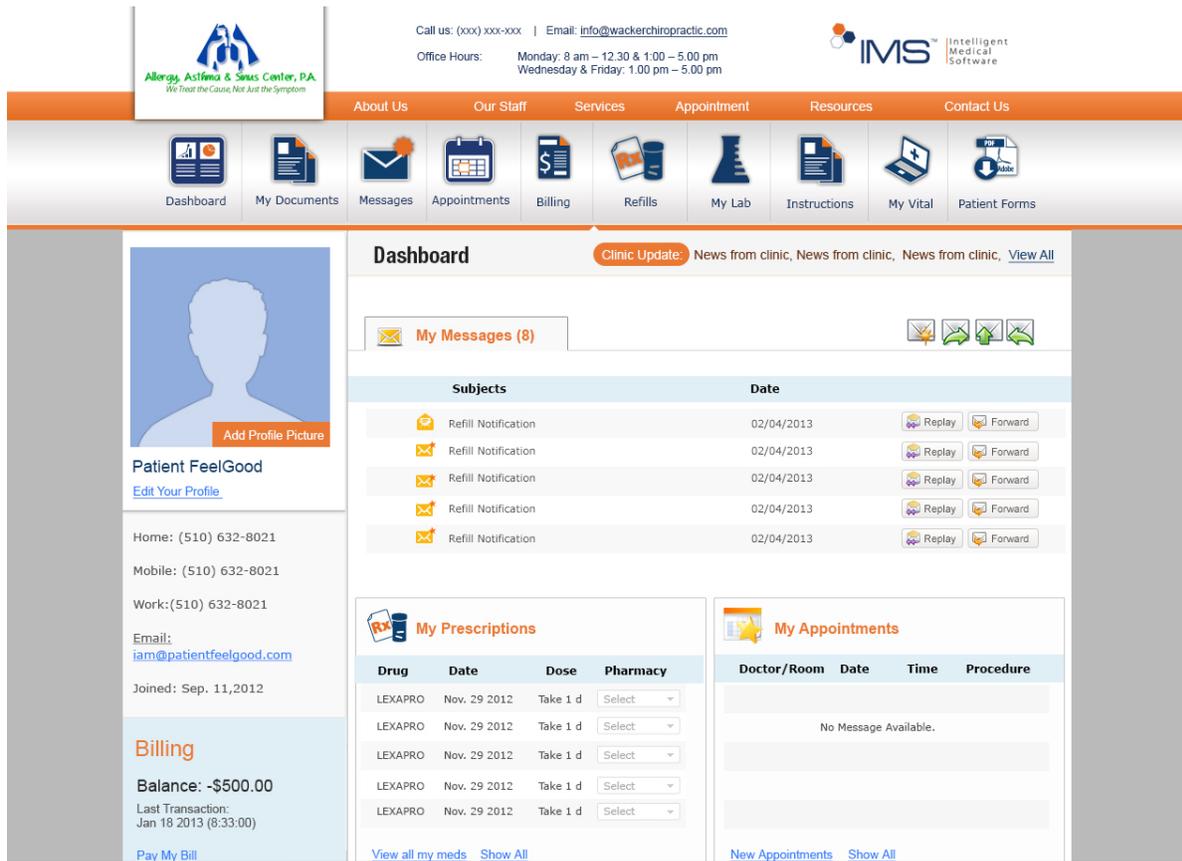

- IMS Care Portal:** A large banner featuring a photo of a doctor examining a child. Text reads: "IMS Care Portal creates greater connection between patient and practice, engaging patients to take part in their own healthcare." Below the text are three small square icons.
- Welcome to Allergy, Asthma & Sinus Center:** A text block explaining the center's goal to provide comprehensive, individualized, and cost-conscious care. It also mentions specialization in treating asthma and allergic diseases of the nose, throat, eyes, ears, and sinuses.
- Our Providers:** A section showing two circular profile pictures of medical professionals.
- Our Staff:** A section showing a group photo of staff members.
- Our Services:** A list of service links: Patient Procedures, FAQs - Immunotherapy, Insurance We Accept, Referring Physicians, and Office Policies.
- Our Locations:** A section with contact information and a map. The contact info includes: "City, 401 Franklin St., 40101, NC 27518, T: (919) 959-4388, F: (919) 959-4393." The map shows the location in City, NC.
- Member Login:** A prominent orange sidebar on the right containing a login form with fields for Username and Password, a LOGIN button, and links for "Pay My Bill", "Request Appointment Online", "Renew Prescription Online", and "Secure Message".

At the bottom right of the page, there is a logo for "Powered By MEDITAB".

SAVE TIME WITH A SMART DESIGN

A key feature that sets the IMS CarePortal apart from other products is simple navigation. Its design is far more advanced than other solutions on the market, which often bury essential information beneath multiple screens or require several clicks to find the data you need. With the CarePortal, providers and patients can quickly reach any information they're seeking in just a few clicks. Another valuable time-saving feature is autotext, which saves keystrokes by automatically populating data fields.

The CarePortal also features natural language processing, which translates unstructured free text into structured values. This means large amounts of information can be formatted into the ICD-10 billing code standards that will be required beginning on October 1, 2014. The portal contains the clinical care procedures and specialized medical technology related to predictive analytics and improved clinical outcomes that can help enhance patient care.

BENEFIT FROM TRUE INTEGRATION AND BETTER SECURITY

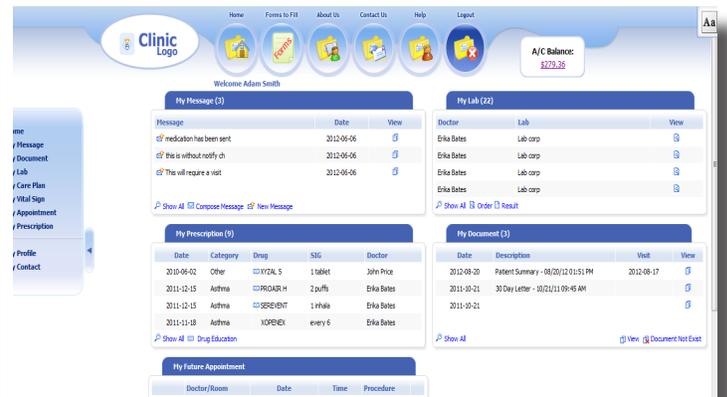

The IMS CarePortal seamlessly exchanges information with the IMS practice management and EHR system in a secure environment. It is fully compliant with HIPAA security and privacy regulations and has 128-bit Encryption technology that meets federal requirements. Additionally, you can control Social Security Number privacy because numbers can be either required, optional or disabled.

If you or your staff must step away from your computer or switch to another activity for an extended amount of time, patient information is secure because the portal features automatic log-out to enhance security. It also records sign-ins, sign-outs, application clicks and patient information viewed.

MEET STAGE 2 MEANINGFUL USE REQUIREMENTS

Secure communication between providers and patients is important now, and will be even more so in the future. Practices that seek to meet Stage 2 Meaningful Use requirements must enable patients to view and download their own personal health information. This is a major component of Stage 2 Meaningful Use attestation, and will be critical for Stage 3 as well.

Additionally, several core measures must be met in order to receive EHR incentives, including providing patients with clinical summaries within one business day of their visit and utilizing secure electronic messaging. The CarePortal can help your practice meet these requirements while improving communication between you and your patients.

Create custom pre-visit forms for your patients to fill-out and have the information automatically imported into your EHR.

IMS CarePortal provides patients with anytime access to educational information, Rx, labs, diagnosis, appointment requests, confidential messaging, bill pay, and much more.

IMS CarePortal Features

Stage 2 Meaningful Use Compliance	IMS CarePortal helps you meet Stage 2 Meaningful Use requirements such as secure electronic messaging and care plan summaries. IMS, v.14.0 is ONC-ATCB certified as a Complete EHR. IMS, v. 14.0 is also certified in CCHIT's separate and independent program and is a CCHIT Certified® 2011 Ambulatory EHR.
Profile Updates	Your patients can add or update information in their profile such as insurance changes and health status to provide you with real-time updates.
Simple Navigation	Quickly reach the information you're seeking in just a few screens with simple navigation and a sleek design.
Natural Language Processing	Information can be formatted into the ICD-10 billing coding standards that will be required beginning on October 1, 2014.
Online Bill Pay	Patients can receive electronic billing statements, view them, and pay their bills easily and conveniently online 24/7 via the patient portal. This feature can significantly improve your cash flow and improve your bottom line.
Appointment Requests and Reminders	Reduce the number of calls your practice receives to schedule, change or cancel appointments. You can also set up automatic appointment reminders so the staff does not have to call patients.
Prescription Refill Requests	When patients need a prescription refilled, they can simply submit a request via the portal instead of calling the office.
Lab Orders and Results	Provide your patients with access to their lab orders and results on the portal so they can view them at any time online.
Medication History and Drug Data	IMS CarePortal is connected to the IMS OrdersPlus prescription module, which tracks medications and refill history. Improve patient care with drug education integration, dosing, allergy, and drug interaction and contraindication checks.
Patient Education and Health Maintenance Reminders	Easily manage chronic conditions with Health Maintenance tools that provide you with patient education, alerts and reminders.
Secure Messaging	Be assured of SSN privacy with secure messaging. The portal is fully compliant with HIPAA security and privacy regulations and has 128-bit Encryption technology that meets federal requirements.
Pre-Visit Questionnaire, Symptom Assessment and Other Forms	Streamline check-in with pre-visit questionnaires, custom health forms and symptom assessments to obtain information necessary to begin an office visit in advance. Patients also can provide required consent for recording and enforcement.
Document Transfer	Patients can upload required documents, forms and more without the need to fax, mail or deliver them in person.
Visit Notes	Patients can view visit notes from their exams and consultations for access to their personal health information.

About Meditab

Established in 1998, Meditab Software, Inc., developers of IMS (Intelligent Medical Software), offers clinical automation systems that maximize productivity, advance patient care, manage utilization, and reduce costs. Meditab develops and supports a multi-award-winning, multi-certified Electronic Health Records (EHR) system that combines clinical charting, e-prescribing, population management, decision support, practice analytics, document imaging and much more, on a single database platform. The company takes tremendous pride in providing comprehensive, user-friendly, and affordable solutions for each practice's unique needs. Time tested and proven, IMS generates tangible returns for medical practices of all sizes. Headquartered in Oakland, California, with offices across the globe, Meditab supports hundreds-of-thousands of users nationwide.

It's Not Too Late to Participate in EHR Incentive Programs

The Medicare and Medicaid EHR Incentive Programs will provide incentive payments to eligible professionals, as they adopt, implement, upgrade or demonstrate meaningful use of certified EHR technology.

Purchase with Confidence

IMS is guaranteed to meet all of the ARRA meaningful use criteria and requirements.

Certified to Meet Meaningful Use

IMS v14.0 is an ONC-ATB Certified Ambulatory Complete EHR. IMS v.14.0 received 2014 edition certification as a Complete EHR from ICSA Labs.

Easily Become a Meaningful User

IMS features a unique Meaningful Use Dashboard that quickly identifies meaningful use deficiencies. Review clinical data with graphical charts identifying patients not meeting clinical measures quickly and easily. Tasks, reminders, alerts and letters can be generated to improve meaningful use status.
